
Internal Family Systems Level 2 training 2027

L2 1679 In-person

Training overview

IFS Level 2 trainings are a comprehensive programme in which participants deepens an understanding of IFS and learn how to apply techniques to various clinical populations.

In addition to thoroughly teaching IFS theory and technique, the Internal Family Systems Level 2 training programme invites participants to explore their own inner worlds in a safe, nurturing context.

Format

The training includes lectures, discussions, demonstrations, video reviews, experiential exercises, and small group supervisions and practices. Previously trained participants, known as Programme Assistants (PAs), will be present to support the learning space and small group work.

Important note: Participants should be aware that the daily experiential work during the training involves small groups for experiential practice sessions to hone your skills with the model. This is where you will learn how to apply IFS techniques to your clients. You will also be client and observer in these practice sessions. As mentioned above the participants are invited to explore their own inner worlds within the training's safe and nurturing context.

Language: The training and the manual will be in English, but there will be opportunities for the Practice Group work to take place in native languages, when the group is led by a Programme Assistant and consists of participants speaking the same language.

Who should apply

All IFS therapists and practitioners with the basic IFS Level 1 training can apply.
